Professional Experience

Full-stack developer with a background in technology investment banking, experienced in building scalable web applications using React, TypeScript, and Node.js. Combines strong engineering fundamentals with commercial and product insight gained from advising technology companies on growth and acquisition strategy.

Freelance - Full-Stack Development

Jun 2025 - Present

- Built and deployed multiple full-stack applications using **React, TypeScript, Node.js, and Express**, integrating third-party APIs and authentication flows
- Designed backend routing layers to manage API rate limits and improve performance through caching strategies
- Implemented state management using **Redux Toolkit & RTK Query** to optimize client-side data handling
- Deployed projects with modern frontend tooling and responsive UI using Tailwind CSS

Projects

[Portfolio Website](#) | *ReactJs, React-Router, TypeScript, Tailwind*

[RedCanvas](#) | *ReactJs, Redux, RTK Query, TypeScript, NodeJs, ExpressJs, Tailwind*

Full-stack web app delivering curated Reddit content via a custom backend layer

- Built an **Express.js proxy server** to handle API restrictions and rate limiting
- Implemented **server-side caching** to reduce redundant API calls and improve performance
- Managed client-side data fetching and cache invalidation using **RTK Query**
- Designed responsive UI with Tailwind CSS

[10 Songs](#) | *ReactJs, TypeScript, Tailwind*

Interactive music game leveraging Spotify's OAuth 2.0 authentication

- Implemented **OAuth flow** and token handling for secure API access
- Built dynamic UI logic to generate rule-based playlist challenges
- Integrated real-time data from Spotify APIs into responsive frontend
